A screenshot of a web browser window titled "Sign up Form". The window has a light red background. At the top center, the title "Sign up Form" is displayed in a large, black, sans-serif font. Below the title, there are three input fields stacked vertically. To the left of each input field is a label: "Name", "Email ID", and "Password". The input fields are white with a thin blue border. To the right of the input fields, there is a single button labeled "Next". The button is light gray with a thin blue border and rounded corners. The browser window has a black title bar with standard minimize, maximize, and close buttons.

A screenshot of a web browser window titled "Course Basket". The window has a light yellow background. At the top center, the title "Course Basket" is displayed in a large, black, sans-serif font. Below the title, there is a list of five items: "Item 1", "Item 2", "Item 3", "Item 4", and "Item 5". The list is contained within a white rectangular box with a thin black border. To the right of the list, there are two buttons stacked vertically: "Add Course" and "Remove Course". Both buttons are light gray with a thin blue border and rounded corners. At the bottom right of the window, there is a single button labeled "Finish Registration". The button is light gray with a thin blue border and rounded corners. The browser window has a black title bar with standard minimize, maximize, and close buttons.

Main Features:

- **Login Page** : The user can login into the application by entering his username and password.
- If the user does not have previously created credentials, he/she can make new one's using the Sign Up button.
- The default **username : test** and **password : test** can also be used to log into the application.
- **Menu Screen** : After logging in, the user is greeted with a menu screen where he/she can select the operation he/she wants to perform.
- **Productivity Hours** : The Productive hours button opens up a new window where the user can input his/her activities' productive state and then generate an hours based record for the whole day.
- **TimeTable** : Next up on the menu bar is the Time table button which helps the user create a systematic time table for themselves.
- **Note Taking** : Then comes the Note taking functionality. Here the user has 2 options, he can either create a random single note or create notes for various different courses specifically. The notes a user creates will be saved automatically or by clicking the Save button and will be available the next time he/she accesses the page.
- **Score Manager** : The Score Manager functionality helps users generate their SGPA/CGPA based on their expected grades and the previous years grades/marks.
- **Activity Map** : The Activity Map button presents the user with an academic calendar for the particular year.
- **Weekly Task Manager** : Clicking on this option provides the user with an option to create a To-Do list for each day and check out the tasks he/she has already performed.

Tools Used:

Java Swing

Java 8.0

NetBeans 8.2

Windows 11

How to run:

- A .jar executable file has been placed in 50_2422_0001_1776_0336/productivityTracker/ which can be run by simply double clicking.
- Make use of Go Back buttons and not directly close else the whole app closes itself.
- By default all the hours have been set to Productive in Productivity Tracker.
